

FABRIC PANEL OPTIONS

SUPPORT DOCUMENT FOR FABRIC PANELS

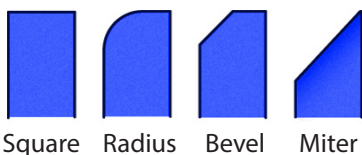

The following is a guide to customize your fabric panel's edge rigidity, edge profile, and installation hardware to best fit the needs of your upcoming sound panel project.

A. NATURAL OR HARDENED EDGE

- Natural Edge - No upcharge
- *Hardened Edge - Add \$10 per panel*
(Recommended for Gymsnasiums)

B. EDGE PROFILE

- Square Edge - No upcharge
- *Radius, Bevel, or Miter Edge - Add \$10 per panel*

C. INSTALLATION HARDWARE OPTIONS

We offer three popular installation hardware options to help with your fabric panel installation.

A. Impaling Clips

- Anchor these clips to your wall
- Apply construction adhesive to the back of your panels
- Press panels to the wall and ensure the teeth of the clips grab the panel
- Default: No additional cost for impaling clips

B. Rotofast Snap-on Anchors

- Our most popular mounting technique for small to mid-size panels
- A plastic clip system that is super easy to use, and requires no glue
- Ideal for any surface, wall or ceiling mount
- *Add \$10 per panel for Rotofast Snap-on Anchors*

C. Z Clips or Z Clips + Wall Bars

- We anchor metal clips to the back of your panels, and ship separate brackets you will anchor to the wall
- A good alternative to the Rotofast Snap-on Anchors for large panels and/or when the mounting surface is brick or concrete block
- *Add \$10 per panel for Z Clips and \$20 per panel for Z Clips & 4' wall bars*
